

Batuğ Koçak

Full-stack developer, AI products. Writer.

batugkocak@gmail.com batugkocak.com github.com/batugkocak İstanbul

I ship full-stack AI software by day and write books, slowly, by night.

I Experience

2024– İstanbul	Company A (placeholder) Senior full-stack developer, AI Led the LLM product line from prototype to paying customers. – Shipped document extraction with a human review queue. – Built the evaluation pipeline used for every model change.
2022–2023	Company B (placeholder) Full-stack developer React, Node, Postgres. Shipped the billing rewrite. – Rewrote billing without downtime.

II Projects

2024–	Ledger — document intelligence for accountants Full-stack product: ingestion, extraction with LLMs, human review queue, and an audit trail that survives a tax inspection. Python, TypeScript, Postgres. Python, TypeScript, Postgres
2025	Retrieval eval harness Open-source CLI that scores RAG pipelines against a labelled set and diffs runs. Python

III Education

2021	Online course (placeholder) Certificate, Machine learning
2016–2020	University (placeholder) B.Sc. Computer engineering

IV Skills

Languages	Python, TypeScript, Rust, SQL
AI	LLM apps, RAG, Evals

Untitled second book

Draft, in progress. A novel about a small town and a large machine. Chapter nine, fourth rewrite.

2024

First book (placeholder title)

Placeholder Press

Essays on making things that have to keep working after you stop looking.
